Brief Description of Program:

Purpose: The North Carolina Comprehensive Cancer Program (NCCCP) is a federally funded program provided through the Centers for Disease Control and Prevention (CDC). The NCCCP is required to develop and implement a collaborative process through which a community pools resources to reduce the burden of cancer that results in risk reduction, early detection, better treatment, and enhanced survivorship. These efforts should encourage healthy lifestyles, promote recommended cancer screening guidelines and tests, increase access to quality cancer care, and improve the quality of life for cancer survivors. The programs are also required to assess current cancer burdens and health disparities and to assess the existing initiatives, capacity, coalitions/partnerships, and infrastructure in the State. In order to accomplish these objectives, the program must reach out to local and regional partners working on cancer issues.

Primary Program Activities include the following:

-
- Provision of professional and public education to improve prevention, detection and control of cancer.
 - Collaboration with communities to foster cancer control through State and regional advisory councils, coalitions and committees.
 - Promotion of partnerships and collaboration with agencies, health facilities and educational institutions to actively work toward the goals and objectives of the Comprehensive Cancer Plan.

Through this joint effort the American Cancer Society, South Atlantic Division (ACS) and the NCCCP will work together to reduce the burden of cancer on the citizens of North Carolina.

Agencies Funded: Community based organizations.

Services Provided by Agencies: Funding awarded for special community activities must assist NCCCP with meeting deliverables and initiatives outlined in the work plan for the Cancer Prevention and Control Program for State, Territorial & Tribal Organizations.

Monitoring: Contractor must submit monthly expenditure reports for reimbursement. Contractors must adhere to stipulations specific within their contractual agreement. Federal mandates must be followed along with performance measures and scope of work agreed upon by both the entity and the State of North Carolina.

Organizations Funded: Private Local Government Both

Source of Funds: State _____ Federal X
