Brief Description of Program:

The Urban Advanced Technology funding is used to benefit transit systems in North Carolina utilizing a wide selection of technologies, enhancing both the passenger experience as well as enabling transit systems to improve safety and efficiencies in their operations. The N.C. Department of Transportation Integrated Mobility Division encourages North Carolina's transit systems to employ advanced technologies fostering increased efficiencies throughout the state. Technology projects must meet the technology definition of "Software and hardware components of technology projects are associated with the technology focus areas." The specific focus area may change annually and will be identified in the Advanced Technology Application. A project's budget may include hardware, software, data communication costs and hosting fees for the first year and the initial training. *Contract administration, facility upgrades and custom reports are not eligible.

On NCDOT's confirmation Grant Master List (GML), these funds are identified as DOT-10

Organizations Funded: Private Local Government Both

Source of Funds: State X Federal
