STATE AND LOCAL GOVERNMENT FINANCE DIVISION  
AND THE LOCAL GOVERNMENT COMMISSION

GREGORY C. GASKINS  
DEPUTY TREASURER

**Memorandum # 2017-15**

**TO:** Municipal Officials and Certified Public Accountants

**FROM:** Sharon Edmundson, Director, Fiscal Management Section

**SUBJECT:** Management of Cash and Taxes and Fund Balance Available – Municipalities for the Fiscal Year Ended June 30, 2016

**DATE:** April 26, 2017

This publication provides comparative cash and investment, fund balance available, and tax levy information of municipal governments for the fiscal year ended June 30, 2016. As in the past, we have added the county assessment-to-sales ratios and have calculated effective tax rates for each municipality. (Note: the effective tax rate is calculated by multiplying the unit-wide tax rate by the assessment-to-sales ratio.) Providing the effective tax rates should result in a better comparison of tax rates between municipalities, given those municipalities are at different points on their revaluation cycles. The average tax rates are calculated on a dollar-weighted basis. In addition, the dollar-weighted average unit-wide effective tax rates for the last five fiscal years are presented. The statistics provide a range of highest and lowest items within a grouping and the mathematical average. Tax collection percentages and average tax collection percentages are presented for all property, all property other than motor vehicles, and motor vehicles only.

The municipalities in this report have been segregated into one of two groups: municipalities with electrical systems or municipalities without electrical systems. Both groups are further segregated into the population groups noted below. The statistics provide the detail of the highest and the lowest items within a grouping and the mathematical average. The Average Tax Collection percentages are calculated by dividing the dollar weighted total of tax levy by the dollar weighted total of assessed valuation for that population group. This analysis presents statistical information for the State as a whole and the following population groupings: 50,000 and above; 10,000 to 49,999; 2,500 to 9,999; 1,000 to 2,499; 500 to 999; and 499 and below.

Municipal officials are encouraged to compare their own performances to similar municipalities and to statewide averages. Such comparisons may identify opportunities for improvement or may indicate improved performances from previous fiscal years. For those municipalities with below average tax collection percentages, collection procedures should be reviewed to determine if more effective means of collection are available. An improvement in tax collection percentages provides numerous benefits to municipalities. It provides more revenues to finance programs, generates additional funds for the investment program, and allows the property tax rate to be lower than would otherwise be necessary. Section 50, “Tax Assessment, Billing, and Collection” in the *North Carolina Department of State Treasurer Policies Manual*, provides information on collection procedures. This section is not currently available on our website at [www.nctreasurer.com](http://www.nctreasurer.com); select “Divisions,” “Local Fiscal Management” and “Policies Manual”. Please contact our office, (919) 814-4299, if you need to order a hard copy of this section. Also, the School of Government at the University of North Carolina at Chapel Hill offers courses in tax collection that may benefit tax collectors in carrying out their statutory responsibilities.

We encourage local officials to strongly consider consolidating the property tax functions of counties and municipalities. Section 50, "Tax Assessment, Billing, and Collection," also contains a discussion on consolidated property tax functions. In addition, Memorandum #692, *Consolidating County and Municipal Property Tax Functions*, and Memorandum #929, *Results of Municipal and County Survey on Consolidating and Billing of Tax Functions*, which discuss joint arrangements utilized by many counties and municipalities, are available from our office and our website. Consolidating the property tax functions should provide more economical use of equipment, office personnel, supplies, and postage. A single tax billing and collection office would simplify taxpayers' efforts to pay and inquire about the status of their taxes. Also, especially for smaller units, a consolidated office should be able to enforce tax collections (attachment and garnishment, levy and foreclosure) at a lower cost. Of course, the most effective arrangement assumes that the municipal and county officials will have a cooperative arrangement.

#### Average Tax Collection Percentages

<u>Population Grouping</u>	<u>2011-12</u>	<u>2012-13</u>	<u>2013-14</u>	<u>2014-15</u>	<u>2015-16</u>
<b>Statewide - All Units</b>	<b>97.48%</b>	<b>97.52%</b>	<b>98.34%</b>	<b>98.87%</b>	<b>99.02%</b>

1,000 to 2,499	96.40	96.16	96.79	97.43	97.68
500 to 999	94.93	95.10	95.67	96.10	96.24
499 and Below	96.70	97.56	97.87	98.26	98.39

For municipalities, the average statewide tax collection percentage increased slightly in 2015-16 and remained high at 99.02%. The high tax collection percentages over the last five fiscal years are a good indicator of the quality of municipal financial management; however in some individual cases there is still room for improvement.

A factor which might adversely affect a municipality's reported collection rate is the treatment of taxes collected by the county or the State by June 30<sup>th</sup>, but not remitted to the municipality until after June 30<sup>th</sup>. Since these taxes have been received by the municipality's agent for collecting taxes, (the county or the

State), these funds can be counted as collected during the fiscal year. These collections should be reclassified from “taxes receivable” to an “amount due from other governments” at fiscal year-end. Any current collections would be included in the calculation of the current year's tax collection rate.

### Average 2015-2016 Tax Collection Percentages

<u>Population Grouping</u>	<u>Excluding Motor Vehicles</u>	<u>Motor Vehicles</u>
<b>Statewide - All Units</b>	<b>98.98%</b>	<b>99.59%</b>

500 to 999	95.98	99.95
499 and Below	98.35	99.82

For the 2015-2016 fiscal year we continue to report collection rates for motor vehicles and property other than motor vehicles separately. These figures are included in the report because the methods of billing and collecting taxes differ between motor vehicles and other classes of property. Tax collection percentages on property other than motor vehicles for municipalities vary according to population, with the largest municipalities having the highest tax collection percentages with exception to the smallest municipalities without electric systems. In September, 2013 motor vehicle tax collections transitioned to being collected by the State on behalf of counties and municipalities through the “Tag and Tax Together” program. The program requires taxpayers to pay their motor vehicle taxes at the same time they pay their vehicle registration fees. As a result, we have seen an increase in motor vehicle tax collection percentages and are beginning to see an overall improvement in the amount of motor vehicle taxes collected. Motor vehicle tax receipts in 2016 exceeded receipts in 2013 by over \$26 million, primarily due to the change in the collection method. Because of the manner in which the taxes are levied and collected, motor vehicle tax collection rates should now be just under 100%.

The report below provides dollar weighted tax rate averages for all five fiscal years presented. The statewide and population grouping statistics on the unit-wide property tax rates over the last five fiscal years are as follows:

**Average Dollar-Weighted Tax Rates**

<u>Population Grouping</u>	<u>2011-12</u>	<u>2012-13</u>	<u>2013-14</u>	<u>2014-15</u>	<u>2015-16</u>

With the exception of the smaller units, a trend can be found between population and both actual tax rates and effective tax rates for the past five fiscal years. Groups with higher populations generally have higher tax rates. The comparatively small number of municipalities making up some of the population groups with electric systems may make those population groups more susceptible to statistical variations. While the averages provide general trend data, there may be substantial variation among individual units within population groups. A consistent trend for tax rates is that for most municipalities the tax rate is lower in the fiscal years immediately following revaluation. Tax rates usually increase as a municipality moves through the revaluation cycle, reaching a peak immediately before revaluation. The effective tax rate is more stable as it is adjusted for actual real estate sales compared to assessed values.

### **Fund Balance Available**

“Fund balance available” is the statutory concept that describes the amount of funds local governments have available at the end of a fiscal year to be appropriated in the next fiscal year. The calculation was introduced as a way to prevent units of government from appropriating funds that they have not yet received in cash form. It is essential that ad valorem tax-levying units, such as municipalities and counties, maintain an adequate amount of fund balance available to meet their cash flow needs during the months in their revenue cycles when outflows exceed inflows. Property tax revenues are a major source of revenue in the General Fund, and are typically not received until the latter months of the calendar year. Therefore, a unit must maintain reserves on hand in the form of fund balance available for appropriation at June 30th to prevent the unit from experiencing cash flow difficulties during the first two quarters of the next fiscal year. As a benchmark, we use the population group averages that can be found in the attached report; if units fall significantly below their group average they may experience cash flow issues during periods of declining inflows.

While the population group average is a reasonable target for most units within the group, some units find they need to maintain more or less than the group average. Units that may want to maintain higher percentages include those with large fluctuations in cash flow, units with significant capital needs, or those that are geographically prone to natural disasters, such as our units on the coast. Units with more stable cash flows or those that have fewer capital needs may find they can operate successfully with lower fund balance available percentages. In any case we encourage units to examine their needs closely and develop at least an informal fund balance policy that sets their expectations for the appropriate amount of fund balance available to be maintained.

It is important to distinguish between the statutory calculation of fund balance available for appropriation and the fund balance that is reported on a unit’s General Fund Balance Sheet. Fund balance available for appropriation represents the maximum amount that is legally available for appropriation in the next year per NCGS 159-8(a). This amount includes funds that are restricted in nature and funds that the unit has already committed to spend in subsequent years for various purposes. For example, fund balance available for appropriation would include any Powell Bill moneys on hand at June 30 that are restricted for use for streets. Those funds will be recorded as restricted fund balance on the Balance Sheet because our General Statutes restrict how the funds are to be spent.

The categories of fund balance that one may see on the Balance Sheet are:

- Non-spendable: fund balance that is not spendable by its nature; created by long-term receivables, inventory, or the non-spendable corpus of a trust
- Restricted: funds on which constraints are placed externally by creditors, grantors, contributors, or laws of other governments or imposed by law through enabling legislation or constitutional provisions. Restricted fund balance includes the amount restricted by North Carolina General Statutes as unavailable for appropriation in the next budget year. As a result the reader of the financial statements cannot make a direct connection between the fund balance that appears on the financial statements and the fund balance available calculation that appears in this report
- Committed: funds to be used for specific purposes as dictated by formal action of the unit’s governing body
- Assigned: amounts that are constrained by the government’s intent but are neither restricted or committed

- Unassigned: funds that do not fall into any of the other spendable categories

The amount calculated (and shown in this report) as fund balance available may be comprised of amounts shown as restricted, committed, assigned or unassigned. While legally available to be appropriated, 100% of fund balance available may not be available to support all operations of a local government or may have already been committed by the governing board.

Using the 8% fund balance metric, which represents only one month's worth of expenditures on hand, as a target, rather than an absolute minimum, may have devastating effects on the fiscal health of North Carolina local governments, particularly small municipalities. Across the state, the average fund balance amounts maintained by municipalities (average of 46.71 %) has continued to increase over the last three years, albeit in small increments. This continued increase may indicate that revenues are starting to rise while expenditures have remained constant or are not increasing at the same rate as revenues. Some of the increase in 2016 also may be attributable to an accounting change which required units of government to report money held to pay future pension and other post-employment benefits (such as the Law Enforcement Officers Special Separation Allowance) as part of the General Fund. In prior years, these funds were accounted for in a pension trust fund. We believe that maintaining fund balance at or close to the current average level for the relevant population cohort is the prudent course for municipalities.

Each year the staff of the Local Government Commission analyzes the financial statements of cities and counties to determine the amount of fund balance available for appropriation in the General Fund, and the amount of fund balance available for appropriation as a percentage of that fund's expenditures. The staff sends letters to units if the amount of fund balance available for appropriation as a percentage of expenditures in the General Fund falls below 8%. The staff also compares the percentage of fund balance available for appropriation to the prior year percentages for similar units, as well as noting the trend in the percentage of fund balance available for that particular unit. If that percentage is materially below the average of similar units, and the trend for fund balance available is declining, the staff will send a letter to alert the unit of this fact. Units are encouraged to evaluate the amounts in reserves and determine if their level is adequate.

The following chart shows the average percentage of fund balance available for appropriation for similarly grouped cities for the fiscal year ended June 30, 2016. Officials should use these figures to compare their unit to similar units and evaluate the adequacy of their unit's current reserves.

\*As of March 27, 2017, we have not received a 2016 audit report from 46 municipalities, therefore the fund balance available, fund balance available without Powell Bill funds, cash and investments, uncollected property taxes figures and tax collection percentage for these municipalities are not included, and indicated with "NR" on the report. Beginning with year ending June 30, 2013, fiduciary funds are not included in the cash and investments figures.

The data presented in this report was gathered from various sources. The financial data, including fund balance and cash and investment income, was obtained from the audit review process. The assessed valuation, tax rate, and last year of revaluation for each municipality were compiled from data obtained from the Department of Revenue. The NC Department of Revenue calculates the assessment-to-sales ratios annually for each county. This ratio is based on a sample of selected real estate transactions within a municipality and equals the assessed valuation divided by the actual sales price. The ratio of the dominant county of the municipality is used as the municipality's ratio. The municipality populations were provided by the Office of State Budget and Management and are estimates as of July 1, 2015 adjusted for end-of-the-year boundary changes. The tax rate equivalents and effective tax rates were calculated by the staff of the Department of State Treasurer. All data included in this report are the most recently available information. If you have any questions concerning this memorandum, please contact Sharon Edmundson at (919) 814-4289 or via email at [Sharon.edmundson@nctreasurer.com](mailto:Sharon.edmundson@nctreasurer.com)

**Explanation of Column Headings:**

- (1) Amounts are net of unexpended debt proceeds and interest earned thereon and Fiduciary Funds.
- (2) Last year in which all real property was appraised; revaluation was effective on January 1 of that year. Counties are required to revalue property at a minimum of every eight years. The year shown for next scheduled general revaluation is the year reported by the county in July, 2015.
- (3) Assessed valuation is based on real property values that were determined as of January 1 in the year of revaluation. This number is adjusted annually for discoveries, abatements, improvements, and any other changes that materially affect real property values. Assessed valuation also includes personal property, which is valued annually on a calendar year basis and titled motor vehicles which are valued as of January 1 preceding the date a new vehicle registration is applied for or a current vehicle registration is renewed.
- (4) "NA" in the assessed valuation, tax rate and tax rate percentage columns indicates the municipality did not levy an ad valorem tax.

"NR" indicates audited financial statements not received
